

PRESS RELEASE

Swiss precision that fits precisely

The Swiss world leader in medical compression socks ventured onto the athletic playing field for the first time in 2009 – triumphantly. A new company division was born out of this enthusiasm for sports: SIGVARIS “PERFORMANCE” Sports Compression Legwear – controlled compression with Swiss precision for maximum benefit. The new “PERFORMANCE” line is specifically geared to the demanding needs of athletes. State-of-the-art fibers and an innovative manufacturing process ensure controlled compression to increase performance and accelerate physical regeneration. SIGVARIS guarantees perfectly calibrated pressure and controlled effectiveness with all its “PERFORMANCE” products.

SIGVARIS receives red dot award

Compression sleeves and socks scored big in the 2011 product design category: In this year’s recent red dot design award judging, the jury honored the innovative compression sleeves and socks from SIGVARIS with the “red dot” seal for their high quality of design. The red dot awards honor the categories of product design, communication design and design concept. Alone in 2010, 14,000 entries from 68 countries were received.

Professional and amateur athletes trust SIGVARIS products

SIGVARIS is the official supplier of the Swiss Challenge League’s St. Gallen football club as well as the entire Swiss Olympic team. Other top-ranked athletes including Germany’s marathon champion, Bernadette Pichlmaier, and Italian world-class biathlete Lukas Hofer swear by the physical effects they gain with the Swiss company’s compression products. In addition, more and more amateur athletes are also discovering the personal benefits of the Performance line every day.

Made in Switzerland

SIGVARIS "PERFORMANCE" Sports Compression Legwear is made exclusively in Switzerland. The entire manufacturing process from development and weaving to sizing and finishing takes place at the company's St. Gallen production facility under the highest standards of quality assurance and environmental consideration.
